EXPERIENCE

Full-stack developer

May 2024 - September 2024

Synergy AI

- Developed an AI-driven platform for a Web3 startup using Tailwind, Shaden, Zustand, React-Query, and Next.js with server-side rendering for front-end. Hosted on Vercel.
- The back-end utilized Supabase for Postgres, real-time database features and authentication as well as Express for microservices. RabbitMQ managed long-running tasks.

Lead Front-end developer

June 2023 - May 2024

Front-end developer

March 2021 - June 2023

Besedo

- Reduced loading time by 30% by the migration of an Angular.js application to a stack utilizing React/Redux-Toolkit and TypeScript
- Ensured over 99% uptime of a Node.js BFF service by periodic dependency updates and rigorous code reviews
- Played a significant role in developing a testing framework encompassing e2e tests, visual regression tests and unit tests
- Contributed to bringing 5 new clients by implementing a long requested feature: company-wide implementation of Single Sign-On (SSO) and Multi-Factor Authentication (MFA)

Front-end developer

July 2020 - February 2021

Mlabs

- Built, styled and shipped production code for enterprise-scale SPA with react/redux, typescript, styled components and firebase
- Collaborated with designers and other developers to build a custom design system based on Material UI
- Developed interactive maps leveraging MapboxGL-JS, enhancing user experience and data visualization capabilities.

Full-stack developer

October 2019 - May 2020

Komputronik Business

- Built and delivered technical solutions with ERP systems Jobrouter and Docuware using PHP scripts, C# and databases like MSSQL, MySQL and Oracle
- Crafted front-end experiences using react, jquery and select2

Front-end developer

November 2018 - October 2019

Sealcode

- Contributed extensively to the creation of e-commerce website zmagazynu.pl and internal projects
- Developed with typescript, react, hotwire and sealious

EDUCATION

Adam Mickiewicz University

Computer Science | October 2017 - February 2021
