EXPERIENCE

Lead Front-end developer   March 2021 - present
Besedo

- Lead the front-end team of 4 developers by fostering close collaboration, mentorship and knowledge sharing
- Spearheaded the migration of an Angular.js application to a modern stack utilizing React/Redux-Toolkit and TypeScript
- Managed a Node.js BFF service to meet front-end requirements
- Played a significant role in developing a testing framework encompassing e2e tests, visual regression tests and unit tests
- Collaborated with product and project managers, as well as fellow engineers, to strategize and implement new features
- Architected and executed the company-wide implementation of Single Sign-On (SSO) and Multi-Factor Authentication (MFA)

Front-end developer   July 2020 - February 2021
Mlabs

- Built, styled and shipped production code for enterprise-scale SPA with react/redux, typescript, styled components and firebase
- Collaborated with designers and other developers to build a custom design system based on Material UI
- Developed interactive maps leveraging MapboxGL-JS, enhancing user experience and data visualization capabilities.
- Created immersive 3D and 2D experiences, leveraging the XeoKit-SDK and a Tailormade software SDK

Full-stack developer   October 2019 - May 2020
Komputronik Business

- Built and delivered technical solutions with ERP systems Jobrouter and Docuware using PHP scripts, C# and databases like MSSQL, MySQL and Oracle
- Crafted front-end experiences using react, jquery and select2

Front-end developer   November 2018 - October 2019
Sealcode

- Contributed extensively to the creation of e-commerce website zmagazynu.pl and internal projects
- Developed with typescript, react, hotwire and sealious
- Worked alongside other developers and designers to transform creative concepts into refined digital experiences

EDUCATION

Adam Mickiewicz University
Computer Science | October 2017 - February 2021
